Kawasaki Brute Force Prairie Manual Mechanical 4WD Actuator Replacement Kit. Fits All Years from 2002 to Current Year. This kit eliminates all electronics required for OEM 4WD Actuator. It is waterproof and especially effective for rough riders in water and mud. With the addition of our Kebc electronic wire harness, your 2WD 4WD indicator lights will work as designed. They have been sold to our valued customers in Canada, Spain, Germany, Ireland, Australia, Guam, Lithuania, and all over the United States, including Alaska with only positive reviews. The housing, housing cover, and lever mounting bracket are made of CNC precision machined aluminum, anodized, and tastefully engraved with our company name. All other components are made of superior materials. Visit FacebookSgroiInnovations to see years of Customer posts, photos and comments Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Register a free business account Please try your search again later. This is NOT a complete kit. It is our popular Sure 4 manual mechanical 4WD actuator operating system only. It requires our hand lever and hand lever mounting hardware, or Tank lever, and our cable to operate. It can be used to upgrade from an older model or to replace a unit that may have been badly damaged while riding. This Actuator Housing has been improved to allow room for oversized tie rods and lifts. It will look slightly different than in this video, but the installation is the same. It carries a Lifetime Guarantee. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. They are manufactured by Sgroi Innovations, LLC and marketed under the brand name Knight Power Sports Parts and Accessories. We have numerous new products in development at all times. Thank Your confidence in us. Please visit our website often and Watch us Grow www.sgroiinnovations.com No more electronic actuator issues, PERIOD! Looks like it came from the factory only better. No more issues getting my vehicle to come out of diff lock like with the OEM electronic actuator. That was a pain in the ass. Love it. Directly to your inbox. Your friend will receive an email from you with a link to our site. Please enter your name, email, and phone number below. We will contact you as soon as this product is available. It requires our hand lever, hand lever mounting hardware, and cable to operate, or our Tank lever shifting system. All Rights Reserved. Please enable JavaScript on your browser, then try again. Kawasaki Teryx KRX 1000 vs. Yamaha YXZ1000R By the Numbers CanAm Renegade 850 By the Numbers Kawasaki Teryx KRX 1000 vs. Yamaha YXZ1000R By the Numbers John Deere Gator

HPX615E By the Numbers Polaris RZR Dynamix Suspension Comparison Built on a solid foundation of knowledge and expertise, Joe Sgroi and his father Sal have teamed up, combining Joe's mechanical and Aerospace engineering experience with Sal's lifelong entrepreneurial experience. Top that off with Joe's passion for the offroad and powersports, and you have a solid basis for their brand, Knight Performance Parts and Accessories. Electronic actuators have limitations, for example, they won't engage 4WD above 15mph, and so the company has solved this problem by developing their Sure 4 actuator and Tank Level shifter sold in a kit or single which replaces the dash mounted switch in favor of a manual level located right next to the gear shift lever in a Teryx. The shifter features a factory installed look. The Sure 4 manual actuator has a low profile aluminum housing with stainless steel shafts and springs allow for high lifts with no obstruction. The manual lever allows you to shift the machine in and out of 4WD while moving, allowing for more aggressive trail riding. This gives the driver more precise control over the machine in a variety of terrains. This applies to the Brute Force as well, with the exception of a different mounting area and an actuator that fits a quad. While the Knight brand of actuators and accessories is focused on the Kawasaki Brute Force and Teryx models, current plans are in the works to expand the current product line to other ATV and SXS manufacturers.

Knight brand actuators are currently used worldwide, including Russia, Canada, Australia, New Zealand and most European countries. Additional accessories including control switches boxes, mounting plates, plug kits, wire harness kits and more. You won't be disappointed with a Knight actuator. Satisfied customers are a strong part of Sgroi's foundation. To back that up, the company stands by their products and offers a lifetime guarantee on the Sure 4. Sure sounds good to me. Raving reviews worldwide add to the company's portfolio, backed by quality, durability, and personalized customer service. For more information or to order online, visit and watch their video below. Louisiana Sportsman is not involved in any transaction and does not handle payments, guarantee transactions, provide escrow services, or offer any protections or certifications. All rights reserved. The Kawasaki Brute Force and Prairie have a common problem with the four wheel drive system not working. The issue is caused by failures of many different devices. All of the problems that these parts can cause with the 4wd can be eliminated with one device, The Sure 4 Manual 4WD Actuator. The Sgroi Innovations Sure 4 is a mechanical system, no electronics can get in the way of shifting the ATV in and out of 4wd. This system simply replaces the actuator that is currently mounted to the front differential of the ATV. A pull cable is connected between this replacement and a lever mounted on the handle bars. When the lever is in the closed position, the bike is in 2wd, when the lever is pulled and locked into the open position the bike is in 4wd. This bypass kit is available on our website or call SgroiInnovations.com at 7327377761 for additional information now!! This system was designed for the tough riders. This is a water tight system that can handle any water crossings and sand or harmful terrain. Our newly redesigned Sure 4 Manual Actuator housing will look slightly different in our updated videos but it is the same reliable actuator. We have simply put it in a smaller housing to allow more room for high lifts and oversized tie rods. Now you simply screw the actuator to the differential, make your adjustments, and then screw the cover on.

This product package contains Sure 4 Manual 4WD Actuator, Hand Lever with thumb latch and wiring for 4WD display lights if you add the Kebc Delete Wire Harness. You must add it to have the display lights work. Installation instructions are with our You Tube videos and above The Sure 4 fits ALL Kawasaki Brute Force and Prairie with 4wd Super high amount of views. 711 sold, 623 available. More Super high amount of views. 711 sold, 623 available. You are the light of the world.
