Motors having the same name and correspondingly belonging to the same series have a similar design, but they may differ in the degree of forcing, the working volume, the way of filling the working mixture. However, for engines 4G13 and 4G15 there is a correspondence of the name to the working volume the first one has 1.3 liters, while the second one has 1.5 liters. Example G13B carburetor, 4cylinder engine with 3 valves per cylinder. Well assume youre ok with this, but you can optout if you wish.
