Hi Pearl, Looking for instructions to replace bearings on a Bosch WFK 2401 washing machine. All vids on the web show an outer twopiece plastic drum but mine appears to be a single piece stainless outer drum and I want to know if I need to remove the entire drum or if I can simply remove the spider arm to replace the bearings. Any thoughts on this. Contractors Assistant Can you guesstimate how old your Bosch is. And just to clarify, whats the exact model WFK 2401. Age is 15 years or more. Contractors Assistant Do you plan on doing the work yourself Yep. Ive replace the motor bearings before and other stuff. Im a mechanic and pretty handy. Contractors Assistant Anything else we should know to help you best. I think that is it. Submitted 1 year ago. NVQ Level 2 electronics manufacturers training courses in England. Verified Hi, Im Daniel welcome to JustAnswer, Im reviewing your question now and will post back with your reply momentarily Ask Your Own Appliance Question Appliance Technician Daniel, Home Appliance Technician replied 1 year ago On your model you dont need to remove the complete tub as all you need to do is remove the spider unit on the back to access the bearings. So remove the motor and remove the drum pulley. Then you can unbolt each leg of the spider and remove it from there. So you dont need to remove the complete drum as its just the spider on the back you need to remove to replace the bearings. Hope this helps. Ask Your Own Appliance Question Customer reply replied 1 year ago Thanks Daniel. Ill be able to give feedback on this in a couple days. Jim.

Appliance Technician Daniel, Home Appliance Technician replied 1 year ago No worries Jim, Thats fine. Ask Your Own Appliance Question Was this answer helpful. NVQ Level 2 electronics manufacturers training courses in England. Daniel is online now Get an Answer Continue Share this conversation See more Related Appliance Questions I have an LG wm2016cw front load washer, had for 9 years. I have an LG wm2016cw front load washer, had for 9 years. Spin cycle became noisy, and noticed fine grey plastic shavings in the drum with the clothes. Lately, with every load I wash, bits of plastic come out of the wash, sticking to every piece of laundry. In the last week it has started making noise during the spin cycle, especially when it is on high speed spin. Sound appears to be getting worse. It is now rubbing on the grey boot as it turns. The last time I used it when I first noticed the problem, the clothes did not spin out completely. I live near Sacramento, California. Pulled apart I have an LG Tromm wm2277hw washer circa 2004. Pulled apart to find a disintegrated spider broken all three arms that resulted in very unbalanced situation. While the washer was

spinning in extra high and down to the last minute on the timer, it suddenly began to bang very loudly. The I have an 8 year old bosch washing machine model WFK 2401. The drum stopped turning. The machine fills with water and drains but the drum never turns. How to approach and what do I have to watch for. I cannot get the shaft from the inner tub to seat completely into the outer tub. The bearings are compressed and seated properly as I can tell.
