Lauri J. 4.0 out of 5 stars I have this 1999 model VSC10 mated to my pair of 1997 Bose model 201s and am quite pleased with the clarity of sound whether at low or uncomfortably loud levels. No bass response whatsoever. Has a very tinny sound. Does not perform well at higher volumes. Actually returned unit and replaced with full size Polk center. So I left with a Denon receiver and Pinnacle subwoofer, and nothing else. I ordered a set of Bose 301s, another set of Bose 201s and used them as front and rear speakers, respectively. They sound great as stereo speakers, but the voices were too quiet before the center channel showed up. I was excited to see this discontinued product was available in a like new condition. It is an excellent addition to the setup and I am glad I have it. The installation was a bit tricky since this center channel is not intended to be mounted on the ceiling. A custom bracket was made with four screws in the top of the speaker and two screws into the ceiling joist. The mount is solid and looks great so close to the ceiling. The center channel joined Bose bookshelf speakers and subwoofer powered by Onkyo HTR590.

The center channel sound was a bit muffled while watching movies with voices missing enunciation clarity of speech. A 10 minute sound calibration with the Onkyo setup mike fixed this problem. I now have crisp clear speech with a real life tone emitting this speaker and a perfect balance with the rest of the HT sound system. After all of my research and doubts from reading negative reviews, I now realize the Bose VCS10 is a quality speaker. Most disappointment is from incorrect sound system setup or pairing it with the wrong equipment. Im glad I gave this center channel a chance. I have no regrets and look forward to years of HT enjoyment with this setup. Polk Audio PSW505 sub. Man i cant sing enough praises for all the components. I dont get the muted sounds on Bose claim. The tonality of the mid range. They dont have enough base you say. All the Boses put together make a real good sound stage. Now on to the non bose components. Kudos to Polk audio for the woofer. Setting up was a real breeze. The Onkyo receiver is a real amazing piece o tech for its price. Audyssey 2EQ

the auto sound setup is really easy to do. These Bose center channel speaker is one of the best I've had. The voices are very clear and the sound incredibly rich and precise. Ainsi lorsque j'écoute de la musique avec un subwoofer pour les bonnes basses. Sorry, we failed to record your vote. Please try again.
