among vehicle manufacturers. Recently Chrysler debuted fee apps for several popular 2011 Dodge models. They're available for iPhone, Android and BlackBerry. Listed in the Android marketplace, I saw apps for the Durango, Grand Caravan, Charger, Avenger, and Journey. That said, I checked out the Dodge Durango Android app, and it had some downsides. For instance, several of the photos appeared as small thumbnails that could not be enlarged for easier viewing. Chrysler isn't the only car maker offering vehiclespecific apps but so far the apps have mainly been designed for alternative fuel vehicles.

For instance, there's an iPhoneonly app for the Toyota Prius. Also, GigaOm recently reported that Ford will offer an app to improve power management and trip planning for the upcoming Ford Focus electric car. Overlooked in the owners manual app approach is the opportunity to update vehicle manual content in response to feedback from car owners. Generally, owners manuals for any type of equipment are not always as clear as they could be. It would be great if this app included a way for owners to ask questions, complain, or recommend changes about specific content pages in the app. Then, the car maker could collect that information, look for ways that the manual could be enhanced, and deliver the enhanced content to the app with regular updates. The social media connections offered by this app could also help on that front. It also would be good to see manuals for older models packaged in apps as well. Right now you can download the PDF version of the owners manual or repair manual for almost any vehicle make, model and year. You can load PDFs onto a smartphone I generally use Evernote for this. However, PDF files are unwieldy to navigate and read on a smartphone. Apps are a more userfriendly way to package this content. While it makes sense to offer apps for newmodel vehicles for free, car makers could probably find a paying audience for apps for oldermodel vehicles. If the car makers don't jump on this, I'll bet some other publisher would be eager to exploit this market. There's no reason to limit the manualapp strategy to cars. As an avid bicyclist, I'd love to have an app for my bike, which showed demonstrations of basic repairs, listed exact sizes and info for parts and accessories, etc. There are several apps, free and for sale, for bike repair, but they're generic and bike models are quite unique. The opinions expressed in this commentary are solely those of Amy Gahran. We're here to tell you not to fear There are solutions.

You may have to register online with your vehicle identification number to get access, but you will be able to browse the manual, download it to your computer as a PDF file and print specific pages you would like to have on hand. The brand sites generally also have warranty information and maintenance guides available for their vehicle models. You also could try the customer service department for the vehicle manufacturer, which is listed in your owner's manual. Oops, sorry — that's no longer a good option, is it. Instead, look online at the brand website such as www.buick.com or www.toyota.com for a tollfree customer service number or get it from a dealer. You could beg for mercy and ask for a free one, but you will likely have to pay for a replacement. Manuals for some vehicle models are available on CDs. In line with Cars.com's longstanding ethics policy, editors and reviewers don't accept gifts or free trips from automakers.
