You may also need to reactivate the Software if you modify your Product or alter the Software. MGIP will use those measures to confirm you have a legally licensed copy of the Software. If you do not use a licensed copy of the Software, you may not install the Software or future Software Updates. MGIP will not collect any personally identifiable information from your device during this process. You may, however, make a one-time permanent transfer of all of your license rights to the Software to another end user in connection with the transfer of ownership of your Product, provided that i the transfer must include your Product and all of the Software, including all its component parts, original media, printed materials and this EULA; ii you do not retain any copies of the Software, full or partial, including copies stored on a computer or other storage device; and iii the end user receiving the Software reads and agrees to accept the terms and conditions of this EULA. MGIP may use this information solely to improve its products or to provide customized services or technologies to you and will not disclose this information in a form that personally identifies you. After installation of the upgrade, you may no longer use the Original Software that formed the basis for your upgrade eligibility, except as part of the upgraded Software. The Software Updates, if any, may not include all existing software features or new features that MGIP releases for newer or other models of Products. Its component parts may not be separated for use on more than one Product. You agree to comply with all applicable international and national laws that apply to the Software, including the export regulations, as well as end-user, end-use, and destination restrictions issued by the Grand

Duchy of Luxembourg and other governments. Your rights under this EULA will terminate automatically or otherwise cease to be effective without notice from MGIP if you fail to comply with any terms of this EULA. <http://ventima.ru/userfiles/7mge-manual-ecu.xml>

Upon the termination of this EULA, you shall cease all use of the Software and destroy all copies of the Software and all of its component parts. Sections 9, 11, 12, 13, 14, and 16 of this EULA shall survive any such termination. However, this remedy is unavailable if failure of the Software resulted from accident, abuse, misapplication, abnormal use or a virus. MGIP is not responsible in any way for the Third Party Software or your use thereof. IN ADDITION, MGIP EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, as to the Third Party Software. Your use of the Software may also be subject to other local, state, national or international laws. The applicability of the Uniform Commercial Code UCC and any other laws that direct the application of the laws of any other jurisdiction are expressly excluded. Any dispute arising out of or in connection with this EULA shall be referred to and finally resolved by arbitration in Luxembourg by a sole arbitrator with the arbitration process as foreseen by the new code of civil procedure. Any translation of this EULA is done for local requirements and in the event of a dispute between the English and any nonEnglish versions, the English version of this EULA shall govern, to the extent not prohibited by local law in your jurisdiction. If you do not agree to the Agreements terms, you may not copy or use the Image in any way. This right to use is personal to you and is not transferable by you to another party. The Image cannot be used to promote or sell any product or technology such as on advertising, brochures, bookcovers, stock photos, tshirts, or other promotional merchandise other than authentic Music Tribe IP Ltd. Products. You may not use the Image in any way that might prejudice the reputation of Music Tribe, or the distinctiveness, validity or goodwill of any of its brands.

You may not use the Image in any way that misrepresents your relationship with Music Tribe. You may not alter, or modify the Image, in whole or in part, for any reason. You, are responsible for your use of the Image and hold Music Tribe IP Ltd free and harmless from any liability connected to your use of the Image. Any misuse of the Image or breach of this Agreement will cause Music Tribe IP Ltd. Midas irreparable harm for which immediate or preemptive injunctive relief may be proper. This is switchable between expander and gate mode and, other than a threshold control, has only a switch for choosing two release time settings. To make the simple controls even simpler, the expander circuit uses Behringers Interactive Ratio Control system, which simply means the expansion ratio varies depending on the program material, the outcome being that the gain reduction isnt so fierce on lowlevel sounds. Well thought out feature set. Nicely styled. Good overall sound quality. Behringers Interactive Knee Adaptation can be switched in to combine the characteristics of hard and softknee compression, while the Lo Contour button places a highpass filter in the sidechain to prevent low frequencies from dominating the compression process. A Tube button simulates tube warmth, presumably by using a nonlinear circuit to create soft saturation effects, and theres also the Enhancer button, which adds highfrequency harmonics to counter any dulling effects when compression is taking place. Unlike normal enhancers, this one tracks the gain reduction to add more enhancement during times of heavy compression. The compressors level meter may be switched to monitor the compressor sections input or output, while a separate Gain Reduction meter is provided, along with a threeLED meter above the threshold control to show where the input signal is in relation to the threshold. This meter also registers any gain reduction due to limiter operation.

Unlike the expander, which has an Off position on the threshold control, the compressor has a bypass button, as does the deesser that follows it. Certainly the controls are simple, with one knob to set the level of attenuation when deessing is taking place and a button to adjust the processing for

male or female voice types — this provides two preset filter options for sibilance detection. A fourLED meter shows how much deessing is being applied. Fast peaks are handled by a clipper circuit, which relies on the fact that brief periods of clipping tend to be inaudible. If the clipping persists for more than 20ms, then the limiter reduces the overall signal gain to avoid distortion and allows it to rise back to normal over a period of around one second. While this is fine for live work, 20ms of clipping is somewhat excessive for studio use where 1ms interludes of clipping are considered to be about the limit. Nevertheless, if the limiter is used intelligently, so that only occasional peaks are clipped, the audible side effects should be negligible. A Limit LED is fitted to show when the limiter is working. A single button in the centre of the unit links both channels for stereo operation, in which case the rotary controls of the righthand channel function as masters. Note, though, that many of the button control functions remain independent — those still active remain illuminated while those under central control are not. It has generous metering with plenty of resolution and the panel layout is tidy and efficient, although some of the lettering is quite small, which may make it difficult to read in live situations with low lighting. On mixes the compressor works fairly benignly, with the Auto mode making light work of changing dynamics. There's little dulling of transients during normal use, and where heavier compression is being used, the enhancer is effective in maintaining an even top end.

<http://fugentechnik-koepple.com/images/cambridge-audio-dab300-manual.pdf>

The Tube emulation is also nicely subtle and seems to have a gentle thickening effect, as well as enhancing the presence part of the audio spectrum. When the limiter is triggered, it too sounds reassuringly transparent, unless severely provoked, and when used as a safety device, rather than as a means of squeezing extra dynamic range out of a signal, you wouldn't know it was acting at all. The expander is far more forgiving than the gate, as is to be expected, and it seems to come in fairly progressively, which helps avoid the starts of sounds getting clipped or decays terminating too abruptly. You still have to take reasonable care setting it up, but in most instances it works well. Gates are less useful on complete mixes, as they can only remove noise during pauses, but they may still be useful for cleaning up starts and ends where you don't have access to computer editing. Even when the meter is showing fairly heavy deessing, there's very little timbral change, so the circuit is obviously more advanced than fullband gain reduction. In practical tests, it wasn't as effective as the deesser on my SPL Channel One admittedly far more expensive, but it was able to cope with most routine jobs with hardly any of that annoying lispiness that many deessers impose. All its sections turn in a better-than-average performance, and the unit has no real vices, though there's nothing particularly exciting about the sound of the compressor either. This probably isn't the compressor to buy if you want to add vintage character, though the tube simulation works well enough, but as a general-purpose workhorse it does a great job at an almost unbelievably low UK price. Whether for live or studio applications, you can't knock it at the price. Retro Jungle Production With Pete Cannon 1 month 1 week ago. Everything You Wanted To Know About Studio Headphones. 2 months 2 weeks ago.

Download an official Behringer user manual in which you will find instructions on how to install, use, maintain and service your product. It can be used to increase instrument and vocal presence energy, limit, and smooth out extremely high signal peaks for sound reinforcement or studio applications. The MDX4600V2 is housed in a single space rackmount chassis and is also applicable to mixing or

mastering. It features an integrated Dynamic Enhancer and LowContour Filter to provide signal enrichment. The MDX4600V2 provides everything you need for studioquality dynamics processing. Please send it to us and help us expand our library of instruction manuals. Add your rating and experience with the product. Let us know and we will try to add the missing manual.
